## PREFACE.

---

In preparing the present edition of our Seed Catalogue, our desire has been to give a selection of the most choice flowers, avoiding the long list of names usually given in catalogues, a great part of which are of no value in our climate.

Having been engaged over thirty years in growing and harvesting seeds—flower and vegetable—we flatter ourselves we can safely select the finest varieties, and such as cannot fail to please amateur cultivators, as it is very difficult for an inexperienced person to select from the long lists usually given. Being extensively engaged in importing and growing the new and rare plants and florist flowers, it will be readily seen that our facilities for saving seed of the choicest description are unsurpassed; the seeds are of a quality which growers alone can offer. Whilst such articles as it is necessary to import are received direct from the first growers in England, France and Germany.

We guarantee that all seed sold by us shall prove to be as represented, to this extent, that should they prove otherwise, we will replace them or send other seeds to the same value. But we cannot guarantee the crop any farther than the above offer, as there are so many causes which operate unfavorably in the germination of seeds and maturity of the crop, over which we have no control. Among the causes of failure may be mentioned unfavorable weather, which is one of the most important. The soil may be in proper condition when the seed is planted, but the weather which follows may be cold and wet, which will cause the seed to rot, or it may be hot and dry, which destroys the germ before it shows itself. The soil may also be unfavorable for the variety of seed planted. The seeds may be and are frequently destroyed by vermin of various kinds. And, lastly, changes not unfrequently occur, especially among new hybridized varieties, by which frequent sports are produced which give the planter the idea that his seeds are badly mixed. Such occurrences are beyond the power of man to prevent and for which we cannot be responsible.

**FORWARD MONEY WITH THE ORDER.**—Please send money with the order, sufficient to cover the whole bill, to facilitate the execution of your orders. During the busy season, to make out bills for customers, mail, charge, and in a few days receive the money, make the proper credit and send receipt, requires more work than we can possibly perform during the great press of business in the spring.

The safe arrival of all seeds are guaranteed. If a package is injured or lost we will replace as soon as informed of the fact.

**PLEASE WRITE THE ORDERS LEGIBLY** in a list apart from the body of the letter, to facilitate execution and prevent errors; orders for *plants* should be on a *separate sheet*.

This Catalogue annuls all former prices.

# CULTIVATION.

---

Flowering plants are from various parts of the world—temperate and tropical—and their habits are as various. Some are found on mountains, others in rich moist valleys, and again on arid plains; it follows that their treatment must be very dissimilar, and that it is not in the province of a catalogue to give any lengthened cultural directions. We will only offer a few general remarks on seed sowing.

In this latitude (Washington) nearly all the Hardy Annuals can be sown in April, say from first to middle, considering the season and the condition of the ground; whilst the more tender varieties—natives of warmer climates—should not be committed to the ground before the middle of May. Such tender plants as Double Zinnias, *Clianthus Dampierii*, Cypress Vine, &c., should not be sown before the latter season, as they are natives of warm climates, and when sown early, and the ground cold, they frequently perish. When this occurs, the blame is of course placed on the seedsman; when, had they been sown in proper season, success would be certain.

**HARDY PERENNIALS.**—The common and large seeded kinds may be sown in the open borders any time in April, but the rare and more delicate species will succeed with greater certainty if raised in a closed frame, with or without bottom heat; thus treated, nearly all will flower the first season if sown early and planted out the early part of May. All those with very small seeds should be sown under glass. Amateurs will do well to bear in mind that though many Perennial seeds vegetate as quickly as those of Annuals, there are some others which usually remain dormant for weeks and even months; to this class belong the Cyclamens, Pæonies, *Fraxinella*, &c. Our native Perennials are best sown in Autumn, or as soon as gathered, and they will then vegetate the following spring. As this is not always practicable, the plan of steeping the seeds before sowing, for twenty-four hours, may be adopted with great advantage in many cases. Half-hardy Perennials require the same treatment as hardy Perennials, differing only in their need of winter protection.

Green-house and hot-house seed need a moist, warm temperature, such as the propagating-house or hot-bed frame. All seeds sown in frames or houses require shading, in bright weather, during the middle of the day, especially as spring advances. For all seeds sown in pots, under glass, a compost composed of well decomposed leaf mould, sand and sandy loam, will answer very well. Sow very thinly; cover the seeds with about their own thickness of soil. After germination has once commenced, the surface of the soil, on no account, should be allowed to become dry. Very small seeds, such as *Mimulus*, *Lobelia*, *Calceolaria*, &c., should not be covered with soil, but be sprinkled thinly on the soil, which should be previously watered from a fine rose. Chinese *Primula* germinates best when covered with a layer of damp moss; this seed often fails to grow from being too deeply covered with soil, and many other failures are attributable to the same cause.

A writer in the "Garden," London, makes the following remarks on the germination of seeds: "I have, at the present time, two kinds of shrub seeds, just appearing above ground, that have been sown, as nearly as possible, two years. In the ordinary course of affairs, many people, not understanding their nature, would have thrown them away at least eighteen months ago and blamed their seedsman for sending them bad seeds. *Primula Japonica* if kept till spring, or until it has become thoroughly dry, will not germinate for at least a year, and sometimes two; and the same holds good in the case of many hardy plants."

## All Flower Seeds Sent by Mail, Postage Free.

For the convenience of persons unacquainted with plants, we have, for some years, put up the following collections, which are varied to suit different latitudes; among which are seeds of our own finest strain, which cannot be excelled; they have invariably given the greatest satisfaction.

### COLLECTION OF FLOWER SEEDS.

100 packages choice Annuals, Biennials and Perennials, including many new and rare varieties.....						\$4 00

## SEEDS OF BEAUTIFUL NEW AND RARE PLANTS.

**BELLIS perennis fl. pleno "Longfellow."** A new variety differing greatly from all existing sorts and resembling somewhat the well-known Daisy "Prince of Wales." It surpasses the latter by producing much larger and very double flowers of a lovely dark rose color, which are borne on unusually long and stout flower stems, being therefore a great acquisition for cut flowers; nearly constant from seed.....

per pkt.

0 50

<b>EXACUM affine.</b> New biennial species from Sokotora, forming small, compact bushes about 6 inches high and having dark green, ovate three nerved leaves and terminal clusters of violet purple, beautiful Cyclamen-scented flowers. It may be cultivated as a temperate stove plant or as a half-hardy annual, and will, when sown in the autumn, produce its flowers very freely and incessantly from February till November; when sown in spring it will flower during the summer and will continue in full bloom through the winter, being in consequence a desirable addition to the winter-flowering decorative plants. A charming novelty.....	per pkt. \$0 75
<b>GODETIA Cavanillesi.</b> New species from Chili, 15 to 18 inches high; leaves linear-lanceolate, flowers nearly 1 inch in diameter, of a brilliant dark blood-red color, which does not exist amongst the whole collection.....	0 30
<b>Lady Satin Rose.</b> "This charming hardy annual is admitted to be the most unique introduction; whether grown in groups in the garden or in pots in cold frames for ultimate conservatory decoration, it is unequalled for brilliancy and general beauty.".....	0 50
<b>Duchess of Albany.</b> New White. The plants are one foot high, branching from the bottom, and producing large clusters of Enothera-like flowers of a beautiful glossy, satiny-white, each about 4 inches across when fully expanded. Profusely covered with trusses of flowers which entirely hide the foliage.....	0 25
<b>Princess of Wales.</b> A vivid and brilliant form. The flowers are of a charming ruby crimson, the outer edges of the petals penciled and shaded with a soft mixture of pale rose and silver grey.....	0 10
<b>Lady Albemarle.</b> It grows to the height of one foot, forming nice shrubby little plants, profusely covered with flowers of a rich glossy crimson; each flower when fully expanded measures over 3 inches across.....	0 10
<b>IMPATIENS Sultani.</b> Very pretty new Balsam introduced from Tropical Africa, of neat dwarf habit of growth. The flowers, which are produced most profusely and in perpetual succession, are of the richest carmine red, and appear in axillary corymbs, the spur is narrow, about 1½ inches long and flesh-colored. Although it is a stove plant, it may be planted out with great advantage in the open border during the summer months, and will by its profuse and continuous bloom prove a first-class ornamental plant, which cannot be too highly recommended. Figured in "The Garden," 1882.....	25 seeds 0 50
<b>STATICE Suworowi.</b> By far the finest of annual Statice, and, indeed, one of the showiest annuals we possess, similar in habit to <i>St. Spicata</i> , but greatly superior to it. Its branching flower-spikes, of a very bright rose with a crimson shade, appear successively from 10 to 15 on each plant, and attain each fully 15 to 18 inches in length, and from a half to one inch in breadth. The foliage, lying flat on the ground, is comparatively small and almost completely hidden by the flower-spikes. A whole bed of this lovely plant in full bloom affords a really magnificent sight, being only one mass of flowers.....	50 seeds 0 75
<b>LAVATERA arborea variegata.</b> Variegated-leaved variety reproducing itself true from seed. The leaves are greyish-green irregularly marbled with dark green and pure white spots; very effective ornamental plant. ....	0 75
<b>PAPAYER "Danebrog."</b> New single flowering Poppy of striking effect. The flowers are of a brilliant scarlet color, bearing on each of the four petals a large silvery white spot forming thus a white cross on scarlet ground similar to the Danish or Swiss national banner. Very desirable and showy novelty.....	0 50
<b>DAHLIAS, Single.</b> Having imported and flowered the past season all the finest single Dahlias in cultivation, seed have been saved from the same with great care. The colors consist of shades of mauve, pink, cerise, orange, crimson, white, yellow, purple and striped varieties.....	0 25
<b>Paragon Strain.</b> Saved from my fine varieties of "Paragon." Many extremely chaste and most beautiful varieties.....	0 25
<b>Double.</b> Our collection of this magnificent flower is unsurpassed in this country or Europe. Saved with care—mixed.....	0 10
<b>Pompone.</b> Mixed. Saved with great care from our prize collections.....	0 10
<b>Dwarf Bedding.</b> From our fine collection.....	0 10
<b>GAILLARDIA, New Double—(Lorenziana.)</b> —The "Garden," speaks of it as follows: "A variety of a popular hardy plant, remarkable for the florets of the head being tubular and colored orange and red. The flowers are some 2 inches or 3 inches across, semi-globose and dense; therefore very showy. It is a valuable and beautiful addition to hardy border flowers.".....	0 20

	per pkt.
<b>MIGNONETTE, Golden Queen.</b> —(Carter's.) "A remarkably distinct yellow flowered variety was recorded as Golden Queen. The Floral Committee when recently visiting Chiswick, signified their appreciation of this variety by awarding a First Class Certificate to it; and this honor it well deserves, for without doubt it is one of the most distinct Mignonettes in culture. The habit is dwarf, sturdy and compact, with flowers closely set to form a good head.".....	0 15
<b>New Hybrid Spiral.</b> —(Miles'.) A variety of robust growth and long elegant spikes.....	0 10
<b>Pyramidal.</b> —Large flowered. This is a grand variety of the old Mignonette, with large, long, grand spikes.....	0 10
<b>ACROCLINIUM Roseum, New Double.</b> A distinct double form of this pretty Annual, possessing all the delicate tints and shades of color peculiar to the single variety.....	0 30
<b>AQUILEGIA Chrysantha.</b> This is unquestionably one of the finest Perennials. Its large golden yellow, long spurred flowers are produced in great abundance from densely tufted plants which maintain a long succession of bloom. ....	0 05
<b>Chrysantha Cœrulea.</b> A seedling from the above, raised in our nursery. A counterpart of the last with flowers of a beautiful blue.....	0 10
<b>Wittmaniana.</b> This is a remarkably fine new species with very large purplish blue flowers. The finest of all Aquilegias.....	0 10
<b>ANASACANTHUS Wrightii.</b> A new plant which I have received from Texas. A shrub that attains a height of four or five feet, bushy, flowers orange, a continuous bloomer, nearly or quite hardy.....	0 20
<b>TUBEROUS Rooted Begonias.</b> These novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the garden, for they produce in the utmost profusion magnificent flowers of very large size, and great variety in color. The tubers rest during the winter months, similar to Gloxinias, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of color of their blossoms, renders them extremely showy and effective. Saved from our rich collection. ....	0 25
<b>CALENDULA Meteor.</b> The flowers of this new variety are large, yellow, striped with bright orange, very desirable.....	0 10
<b>CARTERS' New Clarkia, "Mrs. Langtry."</b> A novel and exceedingly beautiful form of Clarkia. The petals have an even edge ( <i>i. e.</i> are wholly petalled), the color of the flower being purest white with an evenly defined disc or centre, of brilliant carmine crimson. It is remarkably free-flowering, of dwarf compact habit.....	0 25
<b>CANDYTUFT, Dobbies' White Spiral.</b> Very remarkable for its vigorous growth and large pure white bloom, forming a very compact spike like that of the old White Rocket, measuring from 4 to 6 inches in length and 2 inches in diameter. ....	0 10
<b>CLEMATIS, Jackmanii (Strain.)</b> The seed offered was saved with care from our magnificent collection of these lovely climbers.....	0 25
<b>COLEUS.</b> This has been saved with care from our rich collection, which embraces all the fine new American varieties, as well as European.....	0 10
<b>CYCLAMEN Persicum.</b> Very fine strain mixed.....	0 25
Album. White.....	0 25
Atrorubens. Dark red.....	0 25
Giganteum. Much larger than Persicum, fine mixed.....	0 50
White and Purple. Separate colors.....	0 50
<b>ERYSIMUM Pulchellum.</b> A dwarf spreading plant, very hardy, covered with an abundance of yellow flowers in the early spring and during summer.....	0 10
<b>ESCHSCHOLTZIA Crocea Flora pleno.</b> A beautiful bright orange scarlet, shading off to salmon red color. The flowers are very double and of great substance, the appearance of the plant in growth being particularly distinct and charming. It is quite as hardy as <i>E. Crocea</i> , and the flowers are produced in the greatest profusion.....	0 10
<b>Flora pleno alba.</b> Double white.....	0 20
<b>Mandarin.</b> A distinct variety; the outer side of the petals brilliant scarlet, the inner side rich orange; very brilliant in color, and most desirable.....	0 10
<b>NEW JAPANESE DIANTHUS—Eastern Queen and Crimson Belle.</b> These are beautiful forms of <i>D. Heddewigii</i> . Eastern Queen is beautifully marbled, the broad bands of rich mauve upon the paler surface of the petals are very striking and pretty. Crimson Belle—as its name implies—is of a rich vivid crimson lake color; flowers of extraordinary size and substance, evenly and finely laciniated. ....	0 20

	per pkt.
<b>FERN.</b> Spores of the finest species.....	0 15
<b>GERANIUM Zonale.</b> From the latest novelties. Mixed.....	0 15
Apple Scented. Pure seed, own saving.....	0 20
<b>IRIS Kempferi.</b> A beautiful hardy Japanese Iris.....	0 15
Siberica. Mixed.....	0 10
<b>SWEET PEA, Violet Queen.</b> It is dwarfer in habit than the other varieties, and the seed is also quite distinct in appearance, the flowers ranging in color from deep mauve of the keel to light violet of the guard petal, suggestive of the beautiful Bougainvillea.....	0 10
Adonis, (new). Bright rosy carmine.....	0 50
<b>PANSY, or Heartsease.</b> The seed offered is from one of the finest collections in England. A magnificent strain of fine varieties, producing large, handsome flowers of great substance and variety of coloring.....	0 50
Very fine mixed. From a choice English collection.....	0 25
<b>Fancy.</b> Nothing can exceed in beauty and attractiveness these Fancy Pansies. "Flowers are large and of good substance, they have a bold quaintness and marvellous variation of color." "Fancy Pansies are the most free in growth and most gorgeous in color—gorgeous but not gaudy, for many of them are extremely chaste." <i>Extra selected</i> .....	0 50
Very fine Fancy.....	0 25
<b>NEW HYBRID VIOLA, or Bedding Pansy—(mixed).</b> "This is an entirely new strain of Viola from anything hitherto introduced, and consists of the Viola with all the well defined markings of the Fancy Pansy, from deep black to bright bronze, and striped and spotted in an extraordinary manner.....	0 50
Very fine selected.....	0 25
<b>Striata Perfecta.</b> Improved striped and variegated kinds of great beauty.....	0 50
<b>PRIMULA Sinensis.</b> Rich Magenta, a very beautiful and bright Primula—not fringed.....	0 50
<b>Fimbriata.</b> Fine Magenta. A bright and beautiful flower.....	0 50
Rosy Purple. A very rich color, distinct and beautiful.....	0 50
Very bright red. A magnificent flower.....	0 50
Alba. Finest strain.....	0 50
Rubra. Finest strain.....	0 50
The above are our own saving and unequalled by any offered.	
Violet red.....	0 50
Filicifolia. Mixed.....	0 50
Double mixed. Imported, a fine strain.....	1 00
Double Red and Double White. Separate, each.....	1 00
<b>DRACOPHALUM RUSCHIANA, Var. Japonicum.</b> "This is a hardy herbaceous perennial. 18 to 24 inches in height, branching from the base. The violet blue flowers, $1\frac{1}{4}$ inch in length, are in terminal verticillasters, intermixed with numerous obovate acuminate leafy bracts. It is a very pretty and effective herbaceous plant, and one well adapted for bedding out. We strongly recommend it to all lovers of hardy plants.....	0 25
<b>PETUNIA Hybrid Grandiflora Superbissima.</b> The flowers of this new class of Petunias are of a remarkable size, very regular in shape, with a large open centre, making it quite distinct from others.....	0 50
<b>Grandiflora violacea.</b> New and fine.....	0 50
<b>Grandiflora alba.</b> Very fine, large pure white flowers.....	0 25
<b>Large flowering.</b> Striped, mixed. Very fine strain with large and perfect flowers.....	0 50
<b>Large flowering.</b> Fringed and stained.....	0 50
<b>Large flowering.</b> Brilliant red.....	0 50
<b>Dwarf.</b> Compact, striped; inimitable.....	0 25
<b>Double.</b> Finest, (mixed). Very fine strain.....	0 50
<b>Double.</b> Large flowering, (new). Very finest strain of large double flowers.....	0 50
<b>Double fringed.</b> Very finest strain of these very beautiful flowers.....	0 50
The above varieties are the finest of this beautiful and useful flower.	
<b>SALVIA Greggii—(new).</b> A pretty new species which I have just introduced from Texas. This has long spikes of rosy purple flowers; a continuous bloomer, very compact habit, and nearly or quite hardy in this latitude.....	0 25
<b>SILVER TREE (Leucadendron Argenteum).</b> This beautiful small tree has silvery white foliage, very distinct and striking. It will undoubtedly prove hardy in Florida, California, and other parts of this country. Per oz.....	2 00

	per pkt.
<b>TORENIA Fournieri.</b> A very fine new annual, with large sky blue flowers, having three large spots of a dark indigo blue, and a bright yellow stain in the centre of the flower. Continues blooming during summer and autumn.....	0 10
<b>Bellonii.</b> A very beautiful and distinct species from Cochin China, bearing bright yellow flowers with a purplish brown tube, similar in habit to <i>T. Asiatica</i> . Continues flowering during summer and autumn.....	0 15
<b>WALLFLOWER, Extra Fine Dark.</b> Our selected strain of this very beautiful and useful flower can be highly recommended. It blooms very early in the season and produces fine large flowers, of good substance, while the color is all that can be desired.....	0 10

## SELECT VEGETABLE SEEDS.

In offering to the public my stock of Garden Seeds, I do so with great confidence; all are new, fresh and of the finest description. Special attention is given to the selection of such varieties as succeed best in the Middle and Southern States, which from my long and extensive experience I can select with confidence. Such varieties as are best grown in this country are either grown by myself, or by experienced growers by contract for my trade; whilst those varieties it is found necessary to import I receive from the most reliable growers in England and the Continent. All Garden Seeds by the ounce will be prepaid by mail—when  $\frac{1}{4}$  pound and upwards are ordered, 16 cents per pound and 25 cents per quart must be added for postage—as well as on all articles marked thus\*; when this is omitted, an amount equivalent to the postage will be deducted from the order. *No discount on Vegetable Seeds.*

*Campanula Medium Calycanthema Lilac.*

These splendid biennials are almost unrivalled for their brilliant effect in the flower garden, and as single specimens for conservatory decoration, it is scarcely possible to over-estimate their value. In habit the plant differs but little from the well-known form of the old blue and white Canterbury Bell, but while the corolla is much larger, the calyx, in addition, is enlarged to nearly four inches in diameter, presenting the form of a saucer, and changed from its ordinary green color to the same as that of the corolla, thus adding considerably to its beauty. The fact of its coming true from seed renders it easy of access, placing it within the reach of all amateurs and lovers of their garden.

*Price per packet of each variety 10 cents.*
